

JavaScript 程式設計新手村

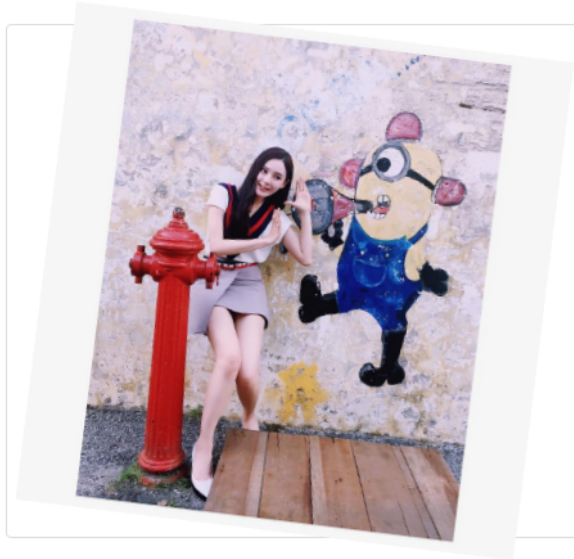

單元26 - Chrome Extensions 實戰

@kdchang

Outline

1. Chrome Extensions 實戰：表特分頁
2. Chrome Extensions 實戰：掰掰臉書

Chrome Extensions 實戰：表特分頁

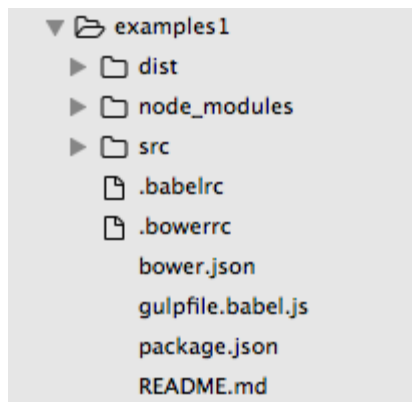

分享生命中的美好事物

不喜翻

本外掛程式為教學使用，圖片取自網路公開資源，若有造成不便，煩請聯絡我們，我們會立即為您處理，謝謝您

整合 gank.io 福利 API

檔案結構

檔案結構

```
.... /dist
..... /bower_components
..... /css
..... main.css
..... /js
..... bundle.js
..... /img
..... index.html
..... manifest.json
.... /node_modules
.... /src
..... /scripts
..... main.js
..... /styles
..... main.scss
..... /images
..... index.html
..... manifest.json
..... babelrc
..... bowerrc
..... gulpfile.babel.js
..... README.md
```

安裝套件

```
$ cd examples
$ npm init
$ npm install --save-dev
babel-core
babel-preset-es2015
babel-register
babelify
browserify
gulp
gulp-connect
gulp-sass
gulp-uglify
vinyl-source-stream

$ bower init
$ bower install --save bootstrap
```

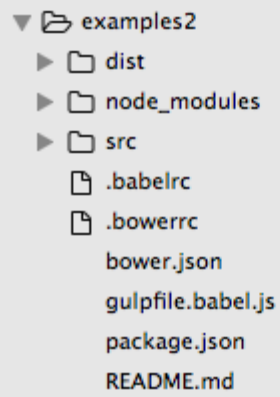

Chrome Extensions 實戰：掰掰臉書

不能再 Facebook 了！！

距離聯考只剩：232天, 3小時, 6分, 7秒

快來用 Google XD

檔案結構

```
▼ examples2
  ► dist
  ► node_modules
  ► src
  .babelrc
  .bowerrc
  bower.json
  gulpfile.babel.js
  package.json
  README.md
```

The diagram shows a file structure for a project named 'examples2'. It is a tree view where the root folder 'examples2' is expanded, indicated by a downward arrow. Inside 'examples2', there are three subfolders: 'dist', 'node_modules', and 'src', each preceded by a right-pointing arrow. Below these folders are five files: '.babelrc', '.bowerrc', 'bower.json', 'gulpfile.babel.js', 'package.json', and 'README.md', each preceded by a document icon.

檔案結構

```
.... /dist
..... /bower_components
..... /css
..... main.css
..... /js
..... bundle.js
..... /img
..... index.html
..... popup.html
..... manifest.json
.... /node_modules
.... /src
..... /scripts
..... main.js
..... /styles
..... main.scss
..... /images
..... index.html
..... popup.html
..... manifest.json
```

安裝套件

```
$ cd examples
$ npm init
$ npm install --save-dev
babel-core
babel-preset-es2015
babel-register
babelify
browserify
gulp
gulp-connect
gulp-sass
gulp-uglify
vinyl-source-stream

$ bower init
$ bower install --save bootstrap
```

總結

1. Chrome Extensions 實戰：表特分頁
2. Chrome Extensions 實戰：掰掰臉書
